

To Whom It May Concern,

I am writing to provide my strongest recommendation for Anton Yushkov, with whom I have had the pleasure of working closely over the past 5 years at Batuta (previously known as MetabaseQ after merging with Flugel IT).

During this time, I have consistently been impressed by his exceptional technical expertise, problem-solving ability, and collaborative spirit. Anton is an exceptionally talented DevOps and Cloud Architect with a deep understanding of modern infrastructure, CI/CD practices, containerization, automation, and cloud ecosystems such as AWS, Azure, GCP and AliBaba. He has a remarkable ability to quickly understand complex systems and design efficient, scalable, and reliable solutions that meet both technical and business needs.

What sets Anton apart is his well-rounded skill set and his eagerness to continuously learn and master new technologies. Whether it's working with Terraform, Kubernetes, Docker, or advanced networking and security configurations, he approaches each challenge with both confidence and curiosity.

Beyond his technical capabilities, Anton is a natural team player and an excellent communicator. He's always available to offer guidance, share knowledge, and help resolve issues — no matter how big or small. His calm demeanor, analytical mindset, and supportive attitude make him an invaluable member of any team.

In summary, I wholeheartedly recommend Anton for any role that requires strong DevOps, cloud architecture, and leadership skills. He would be an incredible asset to any organization seeking someone with both the technical depth and the interpersonal qualities needed to drive success.

Please feel free to contact me if you would like any additional information or specific examples of his work.

Sincerely,  
Cima Qsous  
DevOps and Cloud Architect
